Specification

MCU processor	3.6864MHz MCU
Key	Can customize 1~5 bit touch keys
Current loading	Light switch : 4A Dimmer : 200W/400W
Dissipation power	1.2w
Service life	If contact is 240v,it is more than 100 thousand times for use while full load ; touch panel keys can be one million times.
Operating temperature	-10℃~60℃
Operating humidity	At 50℃ 10%~95%RH
Environment	Transport and store temperature range:-20℃~80℃
Installation	Install to the standard BS4662 switch box with screw and thickening bracket.
Dimension	W86mm X H86mm X D42mm
Applicable	Incandescent lamp; Fluorescent lamp,12v spotlight with transformer,220v spotlight
Dimmer applicable	Incandescent lamp

Dimmer

Dim the light to different brightness,
providing you comfortable and warm atmosphere.

Description

FM stereo, with automatic search function and large storage capacity for over 40 radio stations .

Equipped with IPHONE, IPAD, IPOD TOUCH, USB interface, and can be for IPHONE, IPAD,

IPOD TOUCH Charging.

Easy to do the transfer to audio and video, simple operation.

Meet different tone requirements.

Support mobile phone bluetooth music play.

White color backlight design.

Perfect protection system, with overheating, overloading and short circuit protection.

IV-AP2001SYS

• Structure
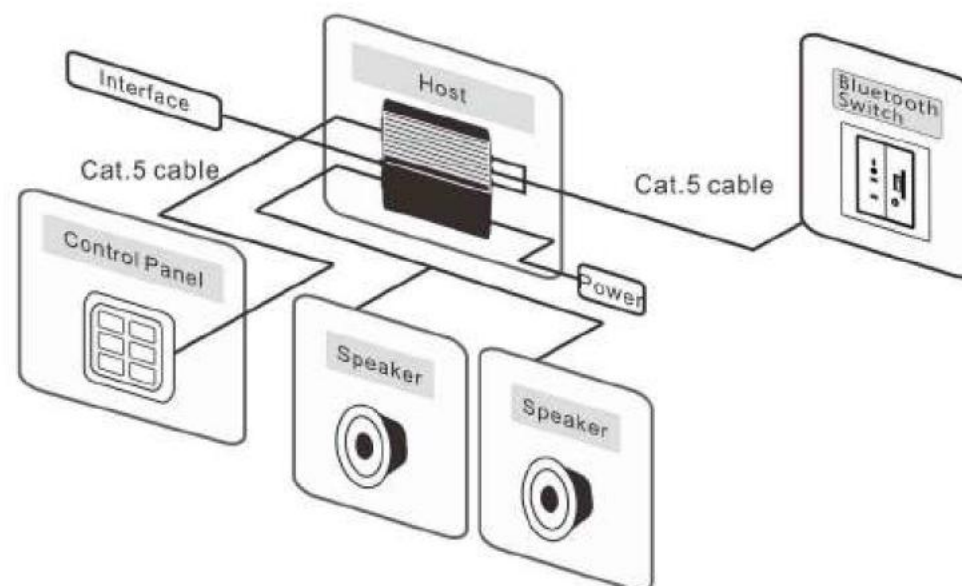

PIR Sensor

- Infare sensor with 1 gang on / off control

- Time delay can be from 1 minute to 20 minutes

- Maximum 15 meters detecting distance

- Loads can be lights, fans, or other kinds of electrical devices

PIR sensor is to turn on / off the loads automatically by detecting person moving within a space .
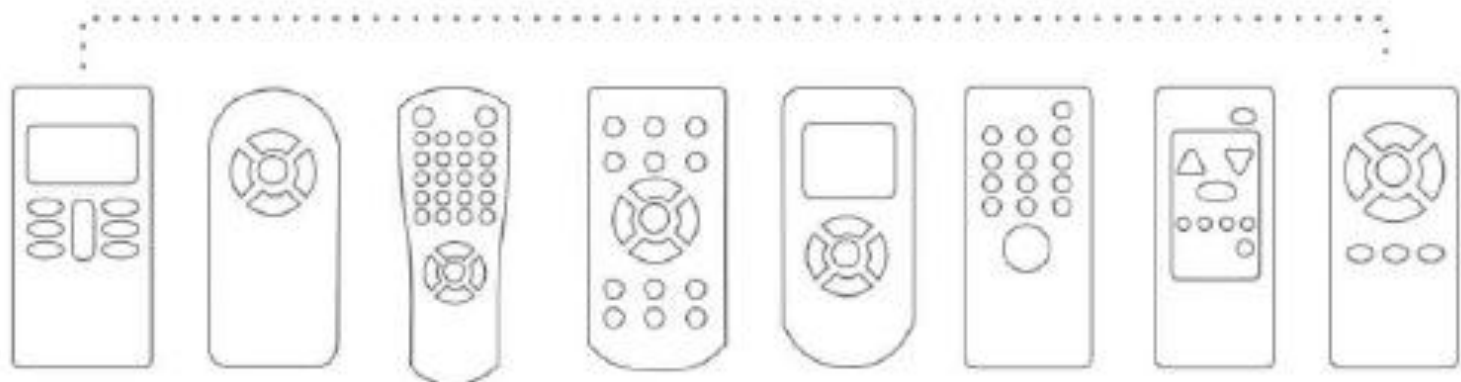

| Door | Corridor | Stairs | Room | Office |

IR Transponder

With IR transponder, you can control all electrical devices by IVOR panels instead of all kind of annoying remote.

AS–X5 Control Unit

X5 is an access control device for single door or specific entrance with card reader inside, keyboard and electric lock controller, providing Mifare S50 non-contacting cards unlock function together with code. Furthermore, it is easy operation with access records checking, ID card data backup /recovery and LCD display functions.

Combined with access control software, X5 offers permission setting and management, supervisory control and data acquisition, realizing access control automation and scientific security management. X5, easy installation and excellent scalability, is widely used in Bank, office, computer room, Intelligent Community, Hospital, Hotel, Factory and so on.
